SOFTWARE DEVELOPER

Dedicated and highly motivated Full Stack Developer proficient in both MERN Stack and Python. Adept at building dynamic, responsive, and scalable web applications with experience in both front-end and back-end technologies. Seeking an opportunity to apply my technical skills in a collaborative and innovative environment.

SKILLS

Front-end :HTML5,Css3,Tailwind Backend & Database: Node,Express Python: Pandas,Numpy,Automation
Css,Java Script,React.js,Bootstrap js,Sql,RestAPIs,Monogodb ML algos,OpenCv

PROJECTS

JMJ THREAD SHOP

July 2024

Billing Software

Developed a Thread Shop Billing Software using Python and SQL to streamline billing, auto-suggest items, generate invoices, and manage inventory. It simplifies daily transactions with a user-friendly interface and real-time stock updates.

Jan 2023 - April 2024

Credit Card Fraud Detection System

In my Credit Card Fraud Detection project, I used Python with Pandas for data manipulation, scikit-learn for the Random Forest algorithm, and imbalanced-learn to address class imbalance. The frontend was built with HTML, CSS, and JavaScript, while Flask served as the web framework to enable seamless interaction between the front and back end. Also used api integration such as twilio for auto sms.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science & Engineering
Scms School of Engineering & Technology

Proficient in full stack development-MERN
Skill Hara

Angela U Full stack web development bootcamp
Udemy
